

MULTI-CHAMBER BALERS

- A** AUTOMATIC BALE EJECT
- B** COMPACT, EASY RELOCATABLE DESIGN
- C** BALE RETAINER HOOKS
- D** BALE FULL WARNING
- E** EASY TO MOVE COMPACTION HEAD

These multi-chamber balers are designed to maximise your efficiency in the work place by making the sorting of waste easy. Your operators are encouraged to segregate different recyclables from the waste stream with these machines. Both models come as top loading.

These balers are quiet in operation, compact, easy to operate and can be accommodated in cramped, busy areas. Each machine benefits from a small footprint yet wide loading aperture to ensure easy loading. The powerful hydraulic press and bale retainer hooks combine to maximise the bale weight. Dense bales also keep bale handling costs as low as possible.

The design and quality of these balers has been continually improved to ensure each customer is totally satisfied and generating maximum savings.
